GitHub: github.com/Anshukumar8529
Email: anshukumardeo9@gmail.com
Mobile: +91-8207711548

SKILLS

- **Languages**: Java, Python, HTML, CSS
- **Data Analysis:** Excel, Power BI, Pandas, NumPy, Matplotlib, Seaborn
- **Machine Learning**: Scikit-learn, Random Forest, Decision Tree, K-Means Clustering
- **Generative AI & LLMs:** LLM APIs, RAG, LangChain, Embeddings, Hugging Face Transformers
- **Databases:** MySQL, MongoDB
- **Developer Tools:** Git, VS Code, IntelliJ IDEA, Jupyter Notebook, Streamlit, FastAPI
- **Core/Fundamentals:** Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks
- **Soft Skills**: Problem-Solving, Time Management, Adaptability, Team Collaboration

PROJECTS

Real Estate Price Prediction & Recommendation System | GitHub | Live Demo Apr' 26 – Jul' 26

- Developed a production-grade machine learning application to solve real estate price opacity by enabling users to estimate property valuations, discover similar apartments, and analyze market trends across 100+ locations.
- Built a decoupled architecture using FastAPI REST microservices for ML inference and Streamlit for the frontend; engineered Scikit-Learn regression pipelines, Pydantic type validation, and Cosine Similarity matrices with geospatial radius filtering.
- Improved property search efficiency and decision-making accuracy by delivering low-latency API responses, containerizing the application with Docker, and deploying it live on Render cloud.
- **Tech:** Python, FastAPI, Scikit-Learn, Streamlit, Pandas, NumPy, Pydantic, Cosine Similarity, Docker, Uvicorn, Render.

Bank Management System | GitHub Jun' 25 – Jul' 25

- Designed a desktop-based banking application simulating core ATM functionalities such as withdrawal, deposit, and balance inquiry with real-time data handling.
- Implemented a modular GUI using Java Swing, integrating MySQL and JDBC for backend connectivity, along with secure user authentication and transaction workflows to ensure data integrity.
- Streamlined banking operations through a reliable and intuitive interface, reducing transaction errors and improving overall user experience.
- **Tech:** Java, Swing, MySQL, JDBC

TRAINING

Java and MySQL: Application Development - Lovely Professional University Jul' 25

- Completed hands-on training in end-to-end desktop application development covering Java, OOP concepts, JDBC, database design, and JavaFX.
- Created 5+ CRUD-based real-world applications, incorporating MySQL for persistent storage and streamlined database operations.
- Simulated an ATM-based banking system, covering user login verification, fund transactions (cash withdrawal, deposit, balance check), and database connectivity via JDBC.

CERTIFICATES

- Data Platform 2025 Certified Foundations Associate | Oracle | **Link** May' 26
- Hacktimus – Hackathon Participation Certificate | Fynd | **Link** Dec' 25
- Java and MySQL: Application Development | Lovely Professional University | **Link** Jul' 25
- The Bits and Bytes of Computer Networking | Google | **Link** Sep' 24

ACHIEVEMENTS

Top 8 Finalist in Binary Blitz Hackathon: Mar' 25

Built heart-disease prediction model showcasing solid ML expertise.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.43*** *Since Aug' 23*
- **Bhagwan Shree Surya Narayan Inter College** Aurangabad, Bihar
  Intermediate; ***Percentage: 82%*** *Apr' 20 – Mar' 22*
- **Vivekanand Vision Ideal Public School** Aurangabad, Bihar
  Matriculation; ***Percentage: 77%*** *Apr' 19 – Feb' 20*
