Projects

Real Estate Price Prediction & Recommendation System | GitHub | Live Demo **Apr' 26 – Jul' 26**

- Built an end-to-end ML application that estimates property valuations, recommends similar apartments, and analyzes market trends across 100+ locations.
- Performed data preprocessing and feature engineering and built Scikit-learn regression pipelines (Random Forest, Linear Regression) for price prediction.
- Developed a content-based recommender using Cosine Similarity with geospatial radius filtering.
- Served the model via FastAPI REST endpoints with Pydantic validation, built a Streamlit frontend, containerized with Docker, and deployed live on Render.
- **Tech:** Python, Pandas, NumPy, Scikit-learn, FastAPI, Streamlit, Docker, Pydantic

Predictive Analysis in Diabetes | Machine Learning-Based Healthcare | GitHub **Nov' 25 – Nov' 25**

- Built a classification model to predict diabetes risk from patient health data, supporting early disease detection.
- Performed data cleaning, exploratory data analysis (EDA), and feature selection to improve prediction accuracy.
- Evaluated the model using metrics such as accuracy, precision, recall, and confusion matrix.
- **Tech:** Python, Pandas, NumPy, Matplotlib, Scikit-learn, Logistic Regression

Poshan Tracker Dashboard | Data Analytics using Power BI | GitHub **Jul' 25 – Jul' 25**

- Built an interactive Power BI dashboard to monitor nutrition and maternal-child health indicators using Poshan Tracker data.
- Cleaned and modeled raw data using Power Query and wrote DAX measures for dynamic KPIs, charts, and interactive filters.
- Surfaced health trends and program performance through actionable visual insights.
- **Tech:** Power BI, DAX, Power Query, Data Modeling, Data Visualization

Certifications

Data Platform 2025 Certified Foundations Associate **May' 26**
Oracle — Certificate_link

Hackathon Participation Certificate **Dec' 25**
Hacktimus — Certificate_link

Unrevealing Basic Python towards ML/AI **Mar' 24**
CSE Pathshala — Certificate_link

Achievements

- **Top 8 Finalist, Binary Blitz Hackathon** — built a heart-disease prediction model. **Mar' 25**

Technical Skills

Languages: Python, SQL, Java
Data Analysis & Visualization: Excel, Power BI, Pandas, NumPy, Matplotlib, Seaborn
Machine Learning: Scikit-learn, Random Forest, Decision Tree, Logistic Regression, Linear Regression, K-Means Clustering, PyTorch
Generative AI & LLMs: LLM APIs, RAG, LangChain, Embeddings, Hugging Face Transformers
Databases: MySQL, MongoDB
Tools & Deployment: Git, Jupyter Notebook, Streamlit, FastAPI, Docker
Core: Data Structures & Algorithms, Data Cleaning, Feature Engineering, EDA, Data Modeling

Education

Lovely Professional University, Punjab **Since Aug' 23**
Computer Science and Engineering — CGPA: 7.43 *Phagwara, Punjab*

Bhagwan Shree Surya Narayan Inter College **2020 – 2022**
12th with Science — Percentage: 82% *Aurangabad, Bihar*

Vivekanand Vision Ideal Public School **2019 – 2020**
10th with Science — Percentage: 77% *Aurangabad, Bihar*
